T3 SERIES PIT STOP STRATEGY EXPECTED TO BE MAJOR ADVANTAGE AT DAYTONA 500

***QUICK-CHANGE BATTERIES MAKES T3 SERIES ELECTRIC PATROL VEHICLE
CAPABLE OF UNLIMITED RANGE AND MULTIPLE SHIFTS***

COSTA MESA, CA (February 13, 2008) – Time means everything during NASCAR pit stops. The less time a driver spends in the Pits, the better. The same applies when providing security and public safety patrols for massive venues like the Daytona International Speedway. The sooner an electric patrol vehicle has full batteries, the sooner it can be used again.

T3 Series Battery Swap

Officials with the 50th Anniversary Daytona 500 will be using the latest in electric personal mobility vehicles, the T3 Series by T3 Motion, Inc., which features revolutionary field-swappable batteries. The T3 batteries can be quick-changed within seconds. The T3 Series is ideal for patrolling the massive 480-acre race track complex. The Daytona 500 typically draws an estimated 200,000 race fans each February. The Daytona 500 joins an impressive list of events which have used the T3 Series vehicles for patrol and security applications including Super Bowls XLI and XLII, the Stanley Cup Finals, the Golden Globes and Academy Awards, and the L.A. Marathon.

“T3 Motion is very excited about the chance to work with the Daytona 500 and demonstrate the T3’s revolutionary hot-swap battery technology which effectively eliminates downtime,” said T3 Motion, Inc. President Neil Brooker. “The resulting unlimited range abilities of the T3 Series are ideal for multi-shift patrols in crowded areas like race tracks, sports stadiums, and concert venues.”

(More)

About the T3 Series:

Reaching speeds up to 25 m.p.h. and designed with the input of law enforcement and security industry professionals, the T3 Series features a zero-degree turning radius and compact design—perfect for maneuvering through crowds and tight spaces. Also unique to the T3 Series is the most user-friendly intuitive operation of its kind giving the rider a sense of superior stability.

The quiet environmentally-friendly zero gas emission vehicles include an integrated LED lighting system and an incomparable low cost of operation—running for less than 10 cents per day and never requiring any down time due to the T3's two re-chargeable, lightweight batteries that can be easily swapped out while in-use for continual deployment and an unlimited range.

T3 Series Features:

- High-performance vehicle with a zero-degree turning radius for improved maneuverability in crowds and tight spaces
- Two rechargeable and interchangeable lightweight power modules for constant use without down time
- Capable of reaching speeds up to 25 m.p.h. for the quickest response possible without officer or personnel fatigue
- An instinctive vehicle with easy-to-operate controls and responsive steering that allow officers and security personnel to focus on response to the situation
- A 9-inch raised platform providing a superior vantage point but still allowing for interaction with the community
- Robust cargo capacity of 450 pounds (rider + equipment) includes the ability to tow personnel and equipment/cargo trailers

Additional T3 Series Features Specific to Law Enforcement and Security:

- Integrated LED lighting system
- Fully-compliant headlights, brake lights and running lights
- Audible sirens
- Lockable glove box for storage
- Optional GPS enabled tracking system

About T3 Motion:

T3 Motion, Inc. revolutionized the world of personal mobility with the introduction of their flagship T3 Series law enforcement vehicles at the International Association of Chiefs of Police conference held in October 2006. Headquartered in Orange County, California, T3 Motion, Inc. is dedicated to raising the bar on environmental standards and law enforcement and security capabilities in personal mobility technology. For more information on T3 Motion, Inc. and the company's signature T3 Series line of personal mobility vehicles visit www.t3motion.com or call (714) 619-3600.
