T3 MOTION WINS PRESTIGIOUS SPARK AWARD AT INTERNATIONAL SPARK DESIGN AWARDS

T3 MOTION'S T3 SERIES PRODUCT GRABS BRONZE IN VEHICLE CATEGORY ALONGSIDE CHRYSLER AND GENERAL MOTORS

IRVINE, CA (July 26, 2007) - T3 Motion, Inc. was honored by the international design industry with a Bronze Spark Award at the prestigious annual Spark Design Awards. Competing alongside companies like Chrysler and General Motors in the Vehicle "Mobility" category, T3 Motion was recognized for its revolutionary yet functional design elements for its flagship T3 Series personal mobility vehicle.

T3 Series by T3 Motion, Inc.

The Spark Design Awards were created to be the world's first multi-level design competition. The international design contest celebrated design in all disciplines—from experimental to mainstream, from product to print.

The international contest was open to 15 categories for professional, student, and novice product design. After receiving hundreds of entries, a field of 62 designs were organized under three umbrellas—general, mobility, and public sector. Criterion used by the expert panel of industry judges was based on product design, process, strategy, integration, aspiration, collaboration, and sustainability.

"We are thrilled to be recognized by our peers for excellence in design," said T3 Motion President Neil Brooker. "When we set out to design the T3 vehicle, we studied the unmet needs and responsibilities of the modern day patrol officer. The T3 answers these criteria with a sleek, purposeful and functional design as well as a sustainable mobility solution."

About the Spark Awards:

The Spark Awards were created to embrace design criteria for process, strategy, integration, aspiration, collaboration, sustainability, and other essential 21st Century concerns. They all add up to betterment—better lives, better health, better water, better air, peace, and liberty. Great design is a critical tool to help us get there. For more information about the Spark Awards, call (866) 846-6715 or visit www.sparkawards.com gallery of entries and winners.

About the T3 Series:

Reaching high speeds up to 25 m.p.h. and designed with the input of law enforcement officials and security industry professionals, the T3 Series features a zero-degree turning radius and compact design, perfect for maneuvering through crowds and tight spaces. Also unique to the T3 is the most user-friendly intuitive operation of its kind, giving the rider a sense of superior stability.

The quiet, environmentally-friendly, zero-emission vehicles include an integrated LED lighting system and an incomparable low cost of operation – running for less than 10 cents per day and never requiring any down time due to the T3's two re-chargeable, lightweight batteries that can be easily swapped out while in use for continual employment and an unlimited range.

T3 Series Features:

- High-performance vehicle with a zero-degree turning radius for improved maneuverability in crowds and tight spaces
- Two rechargeable and interchangeable lightweight batteries power modules for constant use without down time
- Capable of reaching speeds up to 25 m.p.h. for the quickest response possible without officer or personnel fatigue
- An instinctive vehicle with easy-to-operate controls and responsive steering that allow officers security personnel to focus on response to the situation
- An 9-inch raised platform providing a superior vantage point, but still allowing interaction with the community

Additional T3 Series Features Specific to Law Enforcement and Security:

- An integrated LED lighting system
- Illuminating headlights, brake lights and running lights
- Audible sirens
- Lockable glove box for storage
- Optional GPS-enabled tracking system
